Question

Describe this image.

Reward Behavior

Easy but weak response

The image shows a normal street scene with several visible objects. Some objects appear in the background...

Generic

Redundant

Easy to Self-Confirm

Desired Behavior

Specific, grounded res.

Two pedestrians are crossing the road. A red car is on the left, and the traffic light above the street is green...

Diverse

Non-trivial

Image-Grounded

Training Dynamic

● *Reward rises rapidly: the solver model learns to generate simple, easy-to-verify response.*

● *Entropy fluctuates strongly, suggesting unstable optimization and poor reward quality.*
